Professional Summary

Software Development Engineer with experience building enterprise web applications and financial systems. Skilled in full-stack development using Java, Spring Boot, C#, .NET Core, Angular, Oracle SQL/PLSQL, and RESTful APIs. Experienced in developing responsive frontends, scalable backend services, and optimized database solutions. Passionate about cloud technologies, fintech, and AI-driven innovation.

KEY ACHIEVEMENTS

- **Oracle SQL Optimization:** Improved Oracle SQL/PL/SQL query execution efficiency by 20%, significantly enhancing overall system performance.
- **Payment Workflow Improvement:** Reduced recurring payment defects by 15% by designing and implementing enhanced validation processes.
- **Financial Module Development:** Delivered backend solutions supporting debt management, payment allocation, credit processing, and General Ledger transactions.
- **REST API Engineering:** Designed and deployed secure APIs in Java, Spring Boot, and .NET Core.
- **Microservices Contribution:** Contributed to the design and implementation of microservices-based solutions for enterprise financial applications.

WORK EXPERIENCE

Adapt IT (Student Finance Division) - Software Development Engineer

March 2026 – Present

- Developed and maintained enterprise student finance applications used for payment processing, debt management, and credit allocation across higher-education institutions.
- Designed and enhanced RESTful APIs using Java Spring Boot and .NET Core.
- Optimized Oracle SQL and PL/SQL queries, reducing execution times and contributing to a 20% improvement in query performance.
- Collaborated with business analysts and developers in Agile Scrum environments.
- Investigated and resolved production issues, improving system stability and user experience.
- Contributed to microservices architecture decisions for a multi-institution student finance platforms.

TECHNICAL SKILLS

- **Language & Frameworks:** Java, Pro*C, Spring Boot, C#, .NET Core, Python, Angular, JavaScript, HTML & CSS.
- **Database Technologies:** Oracle SQL/ PLSQL, MySQL, MS Access.
- **Cloud & DevOps:** Microsoft Azure, Azure App Services, Azure Functions, Azure SQL Database, Azure Storage, CI/CD Fundamentals, Docker, Git & GitHub.
- **Architecture & Tools:** Microservices Architecture, Object-Oriented Programming, RESTful APIs, Agile/Scrum, Linux (Command Line), Windows, Visual Studio Code.

PROJECT EXPERIENCE

AI Hackathon Project – Agentic AI Assistant

- Developed an AI-powered chatbot and agent-based workflow system using Ollama, Phi-3, Groq APIs, and Python, enabling autonomous task execution and context-aware decision-making through local LLM orchestration.
- Integrated LLM APIs and backend services to simulate agent-based reasoning and decision-making processes.
- Built prompt-driven interactions and response orchestration to improve conversational accuracy and workflow efficiency.
- Applied backend development, API integration, and AI engineering principles during rapid prototyping and testing.

Point of Sale (POS) System – C# (Windows Forms)

- Designed a modular POS system using C# Windows Forms with role-based authentication and layered architecture.
- Integrated MySQL/MS Access for transaction storage.
- Developed sales transaction functionality with automatic calculations and inventory updates.
- Applied OOP principles to ensure maintainable and scalable code.
- Implemented role-based authentication and inventory management.
- Improved usability and maintainability through modular architecture.

EDUCATION

Bachelor of Commerce in Information Systems and Technology

University of KwaZulu-Natal - January 2021 – September 2025

National Senior Certificate

Menzi High School - January 2016 – December 2020

CERTIFICATIONS

- **Full Stack Development Certificate**
FNB App Academy | May 2025 – July 2025
- **Artificial Intelligence Skills Hub Certificate**
Durban University of Technology | June 2025
- **Data Analysis Certificate**
Mzansi Digital Learning | May 2025
- **FortiGate Security – Cyber Security Certificate**
Fortinet Training Institute | January 2024 – December 2024

CORE COMPETENCIES

- End-to-End Software Delivery.
- Scalable Application Architecture.
- API Design & Systems Integration.
- Database Performance Optimization.
- AI & Emerging Technologies.
- Agile Development & Cross-Functional Collaboration.
